Health Resources and Service Administration

HRSA Geospatial Data Warehouse

The Health Resources and Services Administration (HRSA) is an Agency within the U.S. Department of Health and Human Services. As the Nation's Access Agency, HRSA focuses on uninsured, underserved, and special needs populations. The HRSA Geospatial Data Warehouse (HGDW) provides a single point of access to **current** HRSA information, health resources, and demographic data for reporting on HRSA activities. The HGDW is available on the Internet at <http://datawarehouse.hrsa.gov>.

The HGDW promotes information sharing and collaboration among HRSA staff, HRSA partners, health planners and policy makers, as well as HRSA stakeholders. The HGDW provides **quick access** to information that includes:

- Find A Health Center - includes search-by address capabilities, maps and driving directions;
- Identify HRSA Grants by Key Program Area or State;
- Locate Health Professional Shortage Areas (HPSA) by address;
- Identify HPSAs eligible for Medicare Physician Bonus Payment; and
- Locate Medically Underserved Areas and Population (MUA/P) groups, by Address.

In addition, the HGDW provides **report and map tools** that include:

- **Create a Report** –traditional text-based reporting of the data available in the HGDW. Users can select, sort, export and view the data either by spreadsheet or preformatted reports;
- **HRSA In My Neighborhood** – visual display of HRSA-related programs and facilities in an area of interest;
- **Make a Map** –visually explore the HRSA-specific information, health resources and demographic data in geographic relation to one another;
- **Map Data Services** –utilize data from the HGDW to create custom maps and incorporate your own data.

The HGDW data content and functionality are continually evolving so please check the [What's New](#) page often. Comments and suggestions can be submitted through the HRSA Call Center by sending an email to CallCenter@HRSA.Gov or calling them at 1(877) Go4-HRSA.
